华中科技大学计算机学院 武汉光电国家研究中心光电信息存储研究部

读懂一本书, 最好把它变为一页纸

-钱学森

第一框:系统结构总论(A)

第二框:指令系统(Instruction)

指令系统:用硬件实现的命令集 建软硬件的界面(设计指令系统)

两个要素: 1. 数五哪里(寻址)
2. 进行什么操作?

操作码 操作数(引地)

CISC vs. RISC : 都遵循加收经常性事件

1 Instruction

2 Interface

第三框: 处理 (Processing)

第四框:存储 (Storage,memory)

第五框: 互连网络 (Network)

本课程的总"图腾"

· AIPSN全字塔

Architecture

- A: Acceleration Amdahl
- I : Instruction, Interface
- P: Processing Parallel
- S: Storage(Memory), System
- N: Network, coNnection

课程一句话总结:

什么是计算机系统结构的全部内容?

在阿姆达定理的 指导下,通过指令系 统,对数字进行处理、 存储、传输

全剧终

Thank You!

谢谢,再见!

背景音乐: Time to Say Goodbye
