The screenshot displays the Visual Studio Code (VS Code) interface with the ViewComfy project open. The left sidebar shows the file explorer with the project structure, including folders like `scripts`, `services`, `stores`, and `types`, as well as configuration files like `.dockerignore`, `.env`, `.eslintrc.json`, and `.gitignore`. The main editor area shows the `run_heavy.bat` script, which is a batch file for running the ViewComfy application. The script includes comments in Chinese and various commands for setting environment variables, checking for the presence of files, and starting the application. The bottom status bar shows the current file is `run_heavy.bat` and the active window is `run_heavy.bat - V...`. The system tray at the bottom indicates the temperature is 9°C and the date is 2026/1/25.
